FOR IMMEDIATE RELEASE

### **PILGRIM TECHNOLOGY LLC ANNOUNCES NEW NAME, PLANS FOR EXPANSION**

After seven years of successful operations, Pilgrim Technology LLC will begin 2010 with a new name: FS4 USA, LLC. This move is a result of months of talks with FS4 Incorporated, a Michigan-based, government consulting firm.

Pilgrim Technology has been awarded multiple government contracts in communications with the State of Michigan and the U.S. Army, and has also been awarded many other contracts in the communications and technology field.

The merger with FS4 will allow Pilgrim Technology to continue its operations, but on a larger scale as a result of expanding to multiple locations and technology areas. Initial offices identified include a Detroit area office, and Florida-based offices.

FS4 USA, along with its parent company – FS4 Incorporated, will retain all staff currently employed with Pilgrim Technology, and will continue to operate in Midland, Michigan. Together, the companies plan on a period of growth over the next twelve months as operations come together and expansion plans are put into motion.

Jill Pilgrim, CEO and Co-founder of Pilgrim Technology, will become a consultant resource for FS4 as it relates to government business and opportunities. Jim Pilgrim, General Manager and Co-Founder of Pilgrim Technology, is assuming a leadership role in FS4 as the company's Executive Vice President.

“The merger of FS4 and Pilgrim Technology LLC is characteristic of the success that Pilgrim Technology LLC has achieved throughout the years, both in communications and government technology programs. FS4 will continue to seek active involvement in government contracts, and expand the company's reach into multiple technology areas,” commented Jim Pilgrim, FS4's Executive Vice President.
